WRITING

Read the extract below. It is part of a newspaper article on the loss of jobs as a result of the development of Artificial Intelligence, in which readers were asked to sent in their opinions. You decide to write a letter responding to the points raised and expressing your own views. Write your answer in 120 - 150 words. Do not write any postal address.

Will Artificial Intelligence Replace the Real Human Intelligence?

Artificial Intelligence may soon replace many jobs. Artificial Intelligence is exhibiting a slow but steady influence on the value and availability of work. The widespread disappearance of jobs might result in a social transformation unlike anything we've ever imagined. If we run out of jobs, what will our society look like without universal work?

Artificial Intelligence took a huge place in our society and someone Gr
thinks that soon it may replace many jobs.

In my opinion, it is uncanny to replace real human intelligence. First of all, only human beings can imagine and produce new creative ideas. Some jobs need this type of working. For example, artificial Intelligence can not write a book or film a movie about feelings, because it does not feel anything.

One should not ignore the fact that in years artificial Intelligence could not work anymore and there will not be any people who could fix this problem. And then our "evolution" will start from the very beginning. In the end of the day real human intelligence will work again.

In conclusion, I want to say that there is no worry about replacing our jobs. People will not allow to happen it because everyone understands the value of human feelings.
