## WRITING

Read the extract below. It is part of a newspaper article on the loss of jobs as a result of the development of Artificial Intelligence, in which readers were asked to send in their opinions. You decide to write a letter responding to the points raised and expressing your own views. Write your answer in 120 - 150 words. Do not write any postal address.

### Will Artificial Intelligence Replace the Real Human Intelligence?

Artificial Intelligence may soon replace many jobs. Artificial Intelligence is exhibiting a slow but steady influence on the value and availability of work. The widespread disappearance of jobs might result in a social transformation unlike anything we've ever imagined. If we run out of jobs, what will our society look like without universal work?

Nowadays some people think that Artificial Intelligence can replace many jobs, but others say that a lot of jobs can't be removed.

From my point of view, Artificial Intelligence will never replace all workplaces. First of all, some jobs require special skills: fire fighters, police, army service. These jobs can't disappear because people need them.

However, others think that Artificial Intelligence is our future. Moreover, its number is rising slowly but steadily. Society will get used to this changes.

I absolutely disagree with this point. High level of Artificial Intelligence will lead to reduction of lots of jobs, which will cause social and economical problems.

In conclusion, I would like to say that we should keep the variety of different jobs, so everyone could find himself without any troubles.
