WRITING

Read the extract below. It is part of a newspaper article on the loss of jobs as a result of the development of Artificial Intelligence, in which readers were asked to send in their opinions. You decide to write a letter responding to the points raised and expressing your own views. Write your answer in 120 - 150 words. Do not write any postal address.

Will Artificial Intelligence Replace the Real Human Intelligence?

Artificial Intelligence may soon replace many jobs. Artificial Intelligence is exhibiting a slow but steady influence on the value and availability of work. The widespread disappearance of jobs might result in a social transformation unlike anything we've ever imagined. If we run out of jobs, what will our society look like without universal work?

Dear Reader,

I have read the extract from a newspaper about losing of jobs as a result of the development of Artificial Intelligence. Now, I am going to express my own point of view on this statement.

I agree with the fact that such results of scientific progress as robots with their own intelligence can lead to unemployment and even crime in the future. However, computers and other inventions with a programme of planned actions depend on people's carrying as they need to be charged as far as every device with a battery. Moreover, Artificial Intelligence can be attacked by hackers in different ways. It cannot go on working without bugs fixing by computer specialists. So, I am absolutely sure that robots, computers and other devices cannot do their jobs without human assistance providing constance of its work. I am looking forward to you answer as soon as possible.

Yours faithfully,

conf-

Anastasiya Temerbulatova.
