WRITING

Read the extract below. It is part of a newspaper article on the loss of jobs as a result of the development of Artificial Intelligence, in which readers were asked to send in their opinions. You decide to write a letter responding to the points raised and expressing your own views. Write your answer in 120 - 150 words. Do not write any postal address.

Will Artificial Intelligence Replace the Real Human Intelligence?

Artificial Intelligence may soon replace many jobs. Artificial Intelligence is exhibiting a slow but steady influence on the value and availability of work. The widespread disappearance of jobs might result in a social transformation unlike anything we've ever imagined. If we run out of jobs, what will our society look like without universal work?

132 cr.

Dear Mister or Madam,

[1]
Gr

I am writing to you to express my opinion on the topics you raised in your recent article. However, in my opinion, there are some jobs that would certainly not be replaced in the nearest future. Such professions as teachers, scientists and other jobs that require creative thinking would be really difficult for Artificial Intelligence to obtain. It is taking ages for neural networks to understand human speech, so would it be rational to let it teach people and do scientific researches?

I would appreciate a prompt reply with your opinion on my points.

Sincerely,

Lev Shpantsev

[1] There is no doubt that simple jobs like janitors, drivers and factory workers could be replaced with Artificial Intelligence. There are already working prototypes of waiters in some of the restaurants in Japan.
